

An Innovative HVAC Motor for Incredible Efficiency

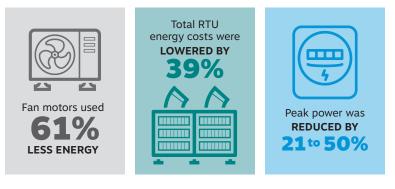

As a certified installer of the Turntide Smart Motor System, **EMCOR Services Team Mechanical** can help you improve the energy efficiency of HVAC equipment — cutting costs and promoting sustainability.

The Turntide system pairs a highly advanced variable-speed motor engineered for efficiency with a cutting-edge controller that can be customized for a range of applications.

PROMOTE ENERGY EFFICIENCY AND GENERATE SAVINGS

According to calculations from ComEd, technology like Turntide can help multiple HVAC components generate substantial energy savings.

Their research demonstrated the following improvements:

Thanks to these energy efficiency enhancements, the Turntide Motor is also a great opportunity for us to help you improve the sustainability of your facilities and reduce your carbon footprint.

OUTSTANDING REBATES AND INCENTIVES

Along with installation, our team can also help secure rebates and incentives from your utility provider to offset costs. Through ComEd's rebate program, we have helped clients cover as much as 70 percent of their installation costs for certain size rooftop units (RTUs) and, as an added benefit, there are incentives available for other HVAC improvements such as new thermostats and RTUs.

Reach out today and talk to one of our technicians about how a motor upgrade can help you save energy and cut costs.

Features of the Turntide Smart Motor System:

- Versatile controls software, promoting efficiency across a range of loads and speeds
- Intuitive interface for easy access to motor data and 24/7 monitoring
- Built-in fault detection and alerts to **improve preventive maintenance**
- Hassle-free retrofits and installation from our certified experts
- Innovative design to help minimize energy loss and improve reliability
- Enhanced indoor air quality and **customer comfort**
